SPERGER

The new outstanding seed treatment by dusting for the prevention of seed born diseases and fungi causing low germination of seed. It is non-poisonous and does not harm the seed under any conditions of soil, moisture or temperature, according to results to date. It can be used for all kinds of seed. You will be pleased and surprised with the results.

1948 SOIL CONSERVATION PROGRAM

Fair prices and minimum specifications as to purity and germination were established by the State Committee of PMA by Howard T. Kingsberry, Acting State Director, on August 28, on the following Legumes:

Austrian Winter Peas,
Singletary Peas,
Common Vetch,
Hubam Clover,
Blue Lupine,

Dixie Wonder Peas,
Hairy Vetch,
Willamette Vetch,
Melilotus indica,

During the past several weeks the value of quite a few of these items has advanced materially. In fact, the cost now prohibits the handling of some of these items on a basis that will enable seedsmen to comply with the fair price basis and still have sufficient margin. This is particularly true on less than car lot quantities; although, in some cases, it can still be accomplished in car lots on a very close basis. The increase in value has been caused by unfavorable weather conditions, reduction in yield, car shortages, etc.

Wholesale seedsmen were quick to recognize the fact that this situation could result in a much smaller acreage of winter legumes than was anticipated or than was planted last year. The wholesale seedsmen requested a meeting with the State Committee and this meeting was held on Wednesday, September 10, at College Station. The situation was thoroughly discussed, and the seedsmen were assured careful and prompt consideration would be given to the possibility of increasing some of the fair price schedules. As to what revisions will result, if any, and when, remains to be seen.

In the meantime, it is necessary that we recommend to our customers, they make every effort possible to sell some of the winter legumes on "Program A" as it is impossible for us to deliver less than car lots on a basis that will enable them to, in turn, sell it at the fair price basis established and have a margin of profit left. Under "Program A," you request your customer to secure a prior permit from his local authorities and then he can pay you a price higher than the fair price basis and collect the same amount of money sometime after January 1, 1948. This just means that your customer will need to wait for his payment until some future date as compared to getting the money at this time under the "Purchase Order Plan."

Yours very truly,

Associated Seeds, Inc
